Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Detailed Action

Status of Claims:

Claims 1-20 are pending in this Office Action.

The amendment to the specification with regards to the abstract has been entered and overcomes the objection to the specification.

The objection to the drawings is withdrawn.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-2, 4-9, 18-20 are drawn to a method of assigning operating characteristics to the computers, classified in class 709, subclass 220.
- II. Claims 3, 10-16 are drawn to a system and methods providing means or steps for managing the resources of the computers connected by a computer network or of the network itself, classified in class 709, subclass 223.
- III. Claim 17 is drawn to a system and method providing subject matter further including means or steps for readying a backup processor or digital data processing system to replace a failed primary processor or digital data processing system, or to receive recent processing result(s) from a backup processor or digital data processing system that may be relied upon, classified in class 714, subclass 13.

The inventions are distinct, each from the other because of the following reason:

Invention Groups I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention in Group I has separate utility such as the use of installing the switch having plurality of processor elements, installing the operating system on each processor element, and configuring the processor elements. See MPEP § 806.05(c).

Invention in Group II has separate utility and is a system and method for managing objects with

an object manager, global and local managers and an object manager controller. Invention in Group III has separate utility and is a tracking and storing data of an object manager global database with a replica.

Inventions in Group I, II, and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are (1) installing and configuring processing elements, (2) managing objects, (3) backing up management and configuration data on a global database.

Because these inventions are distinct for the reason given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II as forth for Group III and Group IV, restriction for examination purposes as indicated is proper.

An election must be made with or without traverse to prosecute one of the inventions of Group I, II, or III, claims 1-20. Affirmation of this election must be made by applicant in replying to this Office action. The remaining claims must be withdrawn from further consideration by the applicant, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

A 1-month (not less than 30 days) shortened statutory period will be set for reply to a written requirement as set forth by 35 U.S.C. 133.
